and about applying for membership.

EUROPEAN NETWORK OF SERVICE PROVIDERS WORKING
IN THE FIELD OF LIFELONG LEARNING WITH AND
ON BEHALF OF PEOPLE WITH VISUAL IMPAIRMENTS

In March 2001, seven European organisations for blind and visually impaired people gathered to form a European network, to share ideas and practices and to work together on research and technology projects. From these beginnings, the group has grown and, with a wider set of objectives, was renamed ENVITER in March 2006.

Our aim is to develop and implement standards and methodologies of professional practice which will enable the continuing inclusion of people with visual impairments.

Our Core Objectives are:

→ To provide a network for service providers working in the field of lifelong learning with and on behalf of people with visual impairments.

→ To provide a European forum for the exchange of knowledge, expertise and experience of the members of this network.

→ To promote and influence good practice in the field of services for people with visual impairments.

→ Jointly to conduct and support research, training and dissemination of evidence based learning directed towards improving access to lifelong learning and other services for people with visual impairments.

→ To share expertise and experience in order to promote the development of services and accompanying best practices, thereby minimising duplication of resource expenditure on service development.
